

Ryan Grant

Data Analyst | Business Analyst

I continually leverage data during my day to day as a Shipping Coordinator and Merchandising Processor. I am fascinated by data, as data tells a story in order to drive business decisions. With my gained knowledge and experience through NSS, I am looking to further my career as a Data or Business Analyst.

EXPERIENCE

Nashville Software School, Nashville, TN

01/2021–Present

Data Analytics Apprentice

- Intensive, real-world project management-based training in data analytics using business intelligence and visualization tools to drive business decisions.
- Work individually and in collaboration with classmates to solve real-world problems and present solutions.
- Create dashboards, presentations, marketing material, and more
- Use Excel, SQL, Python, Tableau, and Power BI.

Projects:

- Nashville City Cemetery Project- clean and analyze a large dataset using excel, and use findings to create and present marketing materials.
- Lahman Baseball Stat Analysis - Analyze a baseball dataset with extensive statistics from 1871 to 2016, and answer guided questions designed to fully explore SQL.
- App Trader - Collaborate with a team to analyze Google and Apple app store data, and present our findings.

Jeni's Splendid Ice Creams, Nashville, TN

04/2020–Present

Shipping Coordinator, Merchandise Processor

- Utilize shipping software to finalize ecommerce and wholesale orders prior to shipping; including managing shipping costs and ensuring deliveries will be made on time.
- Oversee online inventory for the company's Nashville fulfillment location and third party vendors through an online inventory management system.
- Collaborate with the allocation team to place inventory replenishment orders for local Jeni's ice cream shops.

Service Industry Experience

11/2014–03/2020

Bartender, Server, Server Assistant

- Worked for several notable restaurant groups throughout my career in hospitality, including working under a Michelin starred chef.

Accomplishments:

- Managed bar inventory and was responsible for receiving and stocking product deliveries.
- Collaborated with teammates to create new cocktail recipes and curate seasonal menus.
- Frequently trained new servers and educated front of house staff on new cocktails, wine, and menu changes.
