EXPERIENCE

Nashville Software School

January 2022 - Present

Fast paced bootcamp learning with widely known and used tools such as Excel, Python, Power BI, SQL, and Tableau. This bootcamp is geared more towards self learning and working with groups. Projects that have been finished so far have utilized Excel and SQL.

- Elderly Assistance Project: Group project and we used the learned skills from excel to create pivot tables and present a dashboard.
- Historic Cemetery Project: This again was to show our own skills gained from Excel and used Canva to create visualization.
- Yelp Charlotte Project: A group project experience with power pivot knowledge instead of just excel; presented analysis from data,
- App Store Project: Used skills learned in SQL and Pgadmin to pull answers from data and using Excel to bring in visualizations.
- Lahman Baseball Project: current projects, using SQL and Pgadmin to analyze data.

Mellow Mushroom, Nashville TN — *Manager/Server*

June 2020- December 2021

Ensuring that the customer got the best possible experience, having knowledge of BOH and FOH, I was capable of making sure that food went out properly and beautifully; ensuring that the environment was clean and welcoming. Having a positive and happy attitude with the customers and remaining professional to meet all their needs. At this location, I helped get near 100 surveys submitted, helping this location reach #4 nationwide and boost the health dept score by almost ten points with all of my cleaning since having worked there. My background with my own cleaning business helped me gain that opportunity of work.

Voodoo Cleaners, Spring Hill TN — *co owner*

January 2020 - PRESENT

Promoting and building the brand online and in person, attending meet ups and networking. Taking calls with new/potential clients and existing clientele. Creating a schedule and managing bookkeeping. Giving the client the best experience we bring to each clean.

Mammy's Kitchen, Bardstown KY — *Night Shift Leader*

December 2017 - January 2019

I was Responsible for managing my line cooks and dish pit, between five and seven employees under my watch. I was able to create specials and was responsible to inform the front of house to also promote what needed to be sold daily. Keeping my crew focused and motivated and teaching new techniques with not only the cooking but cleaning and personable skills to help them grow on their own career path. I have always enjoyed a leadership position and am self driven to always achieve more. I was responsible for ensuring a completely stocked kitchen each night and keeping up with inventory. I would manage my crew during down time to individual cleaning projects to ensure the cleanest kitchen and keeping everyone focused. I have extreme attention to detail in all that I do.

Maywood Country Club, Bardstown KY- sous/ shift leader

May 2017- December 2017

I was responsible for managing my line cooks, creating specials and making sure they ran properly. Giving the attention to detail for not only cooking but cleaning the kitchen as well. I taught others how to properly maintain. I kept knowledge of stock and what was in inventory. I thoroughly enjoyed this position and all the wonderful specials that were created.

Banana Republic, Denver CO — *Sales Ambassador*

May 2016 - May 2017

I was responsible for maintaining a clean and welcoming environment for customers coming in. To be able to multitask with any job assigned for the shift; being available to customers and to be able to listen to the team communicating via headset. It was needed to be available to answer any questions a customer may have and to give them the best experience possible. I would ensure that each customer walking in would be aware of the daily or weekly deals and promo. I would help build up outfits and upsell products. It was part of the job to discuss opening a credit line through the BR rewards program with each customer during their shopping experience.
