PROFILE

I love to work in fact finding from any type of data that, kept in any form. I am always happy dealing with data fact visualization through effective data extraction, transfer, and loading for further exploration and analysis. I am very enthusiastic towards fine-grained data representation in a more meaningful way and information builds up using the latest industry, recommended tools. I am experienced on meta data creation on the #1 CRM, Salesforce database environment. I am a detail-oriented person. I am always ready to learn any industry updates and recommended practice.
