Madison Media Institute
JUN 2008 - SEPT 2009
Associates Degree

ABOUT ME

When it comes to trouble-shooting and managing complex projects, I would have to say that I am your problem-solver. Not only am I continuously motivated to pursue my educational focus and excellence, but I am also captivated by the management of complex projects I have witnessed in my education. My current technical knowledge is steadily growing as I have had the great fortune of learning from a vast array of local teachers, varying occupations, and the endless software applications I have delved into. While striving to be the best version of myself has always been set high on my list of priorities, I am steadfast in my willingness to help those around me in however which way I am needed.

WORK EXPERIENCE
